

Insurance

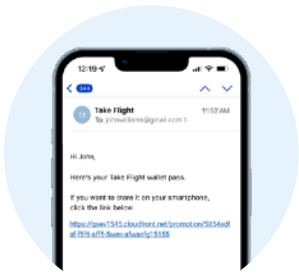

Digitize insurance cards and let your customers access their insurance information anywhere. With almost a decade of experience working with 3 of the top 10 global insurance companies, we are experts in digital transformation and data compliance when it comes to digitizing insurance cards.

- Transform your business from physical cards to digital memberships.
- Reduce your costs and carbon footprint by digitizing documents and automating manual processes.
- Simplify your customer onboarding process and reduce friction at the point of purchase.
- Enhance customer communication with direct messages sent to their mobile devices. Schedule appointments, customer calls, and send expiration notices.

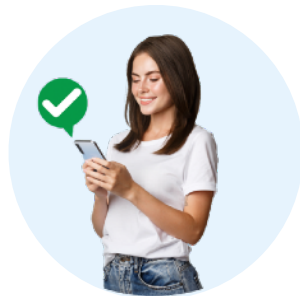

How it Works

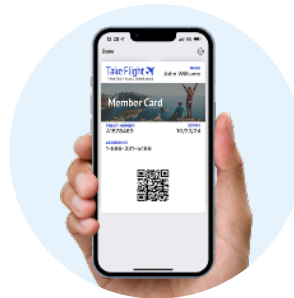

1. Distribute

New and existing customers receive a link to save their card to their mobile wallet

2. Download

Customers click on the link they receive by email or SMS to download their insurance card

3. Use

Customers can access their insurance information at any time through their digital wallet

4. Engage

Customers receive notifications to remind them to renew their insurance, upgrade their plan, etc.

Success Story

One of the Top 10 Global Insurance Companies

Our client, one of the top 10 global insurance companies, uses our Wallet passes to enable their customers to quickly find relevant insurance information on their phones.

A wide variety of insurance types are supported such as health, travel, group, individual, and pet insurance policies.

Our insurance clients rely on Passcreator by Fobi because of our direct integrations, flexibility, robust security, and amazing customer service.
