

Sovereign intelligence, identity and digital trust infrastructure for the AI era

AI that enterprises can control. Identity they can trust.

Security built for what comes next.

TSXV: FOBI | PINK: FOBIF | INVESTORS.FOBI.AI

IMPORTANT INFORMATION

This presentation provides general information about Fobi AI Inc. and its business as of September 21, 2026, unless otherwise stated. The information is presented in summary form and does not contain all information that investors may consider relevant when evaluating the Company.

This presentation is provided for informational purposes only and does not constitute an offer to sell or a solicitation of an offer to purchase securities in Canada, the United States or any other jurisdiction. No investment decision should be based solely on the information contained in this presentation. Investors should review the Company's complete public disclosure record available under its profile on SEDAR Plus at www.sedarplus.ca and obtain independent legal, financial and tax advice.

This presentation has been prepared by management using information available to the Company and information from sources believed to be reliable. Industry and market information may be based on management estimates and publicly available sources and may not have been independently verified. No representation or warranty, express or implied, is made regarding the accuracy, completeness or reliability of such information, except as required by applicable law.

FORWARD LOOKING INFORMATION AND STATEMENTS

This presentation contains forward looking information and forward looking statements within the meaning of applicable Canadian and United States securities laws. Such information includes statements regarding the development, commercialization, capabilities and integration of FORTRESS, AltID 3.0, FIXYR and AgenticBrain; the continued development of the Fobi AI technology ecosystem; customer adoption; potential revenue opportunities; strategic relationships; market expansion; and the Company's business strategy, objectives, plans and growth opportunities.

Forward looking information may be identified by words such as anticipate, believe, expect, estimate, intend, may, could, should, plan, target, potential and similar expressions. This information is based on assumptions and expectations that management considers reasonable as of the date of this presentation, including assumptions regarding access to capital, product development, customer demand, commercialization, regulatory conditions, technology performance and the availability of personnel and strategic partners.

Forward looking information is subject to known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements to differ materially from those expressed or implied. These factors include economic and market conditions, access to capital, commercialization and customer adoption, competition, protection of intellectual property, regulatory developments concerning artificial intelligence, data privacy, digital identity and cybersecurity, cybersecurity incidents, dependence on key personnel and the Company's ability to maintain timely continuous disclosure. Additional risks are described in the Company's public disclosure record available on SEDAR Plus.

The Company's recently launched products are at an early stage of commercialization. There can be no assurance regarding the timing or amount of revenue generated from these products or that the Company will achieve its objectives.

Readers should not place undue reliance on forward looking information. The Company undertakes no obligation to update or revise such information except as required by applicable securities laws.

Neither TSX Venture Exchange nor its Regulation Services Provider, as that term is defined in the policies of TSX Venture Exchange, accepts responsibility for the adequacy or accuracy of this presentation.

ABOUT FOBI AI 3.0

Fobi AI is building the **sovereign intelligence, identity and digital trust** infrastructure for the AI era

As AI moves from answering questions to making decisions and taking action, enterprises must control their data, verify every interaction and secure access across people, devices and autonomous agents

THE ENTERPRISE CONTROL LAYER

SOVEREIGN
INTELLIGENCE

VERIFIED
IDENTITY

SECURE
DIGITAL TRUST

Why Fobi

A unified architecture for the AI-powered enterprise

Intelligence, identity, communication and action in one connected system

Why now

The market is converging around Fobi's architecture

AI IS BECOMING AGENTIC

Enterprise systems need identity, permissions and accountability when software can take action

DATA SOVEREIGNTY IS STRATEGIC

Governments and regulated industries increasingly care where data resides and who controls it

DIGITAL IDENTITY IS EXPANDING

Trust must extend beyond people to devices, credentials and autonomous agents

QUANTUM MIGRATION HAS STARTED

Organizations must modernize cryptographic foundations before the risk becomes urgent

Fobi is positioned where enterprise AI growth meets the requirement for sovereignty, security and digital trust

Enterprise AI has reached a **trust inflection** point

AI is moving from answering questions to taking action inside critical systems

SOVEREIGNTY

Where data resides, who controls it, and which laws govern it

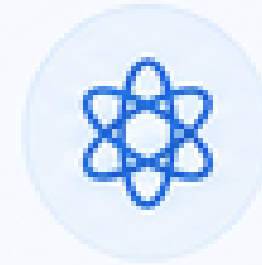

SECURITY

How systems protect proprietary data, access, communications, and automated actions

DIGITAL TRUST

How enterprises verify the person, device or agent behind every interaction

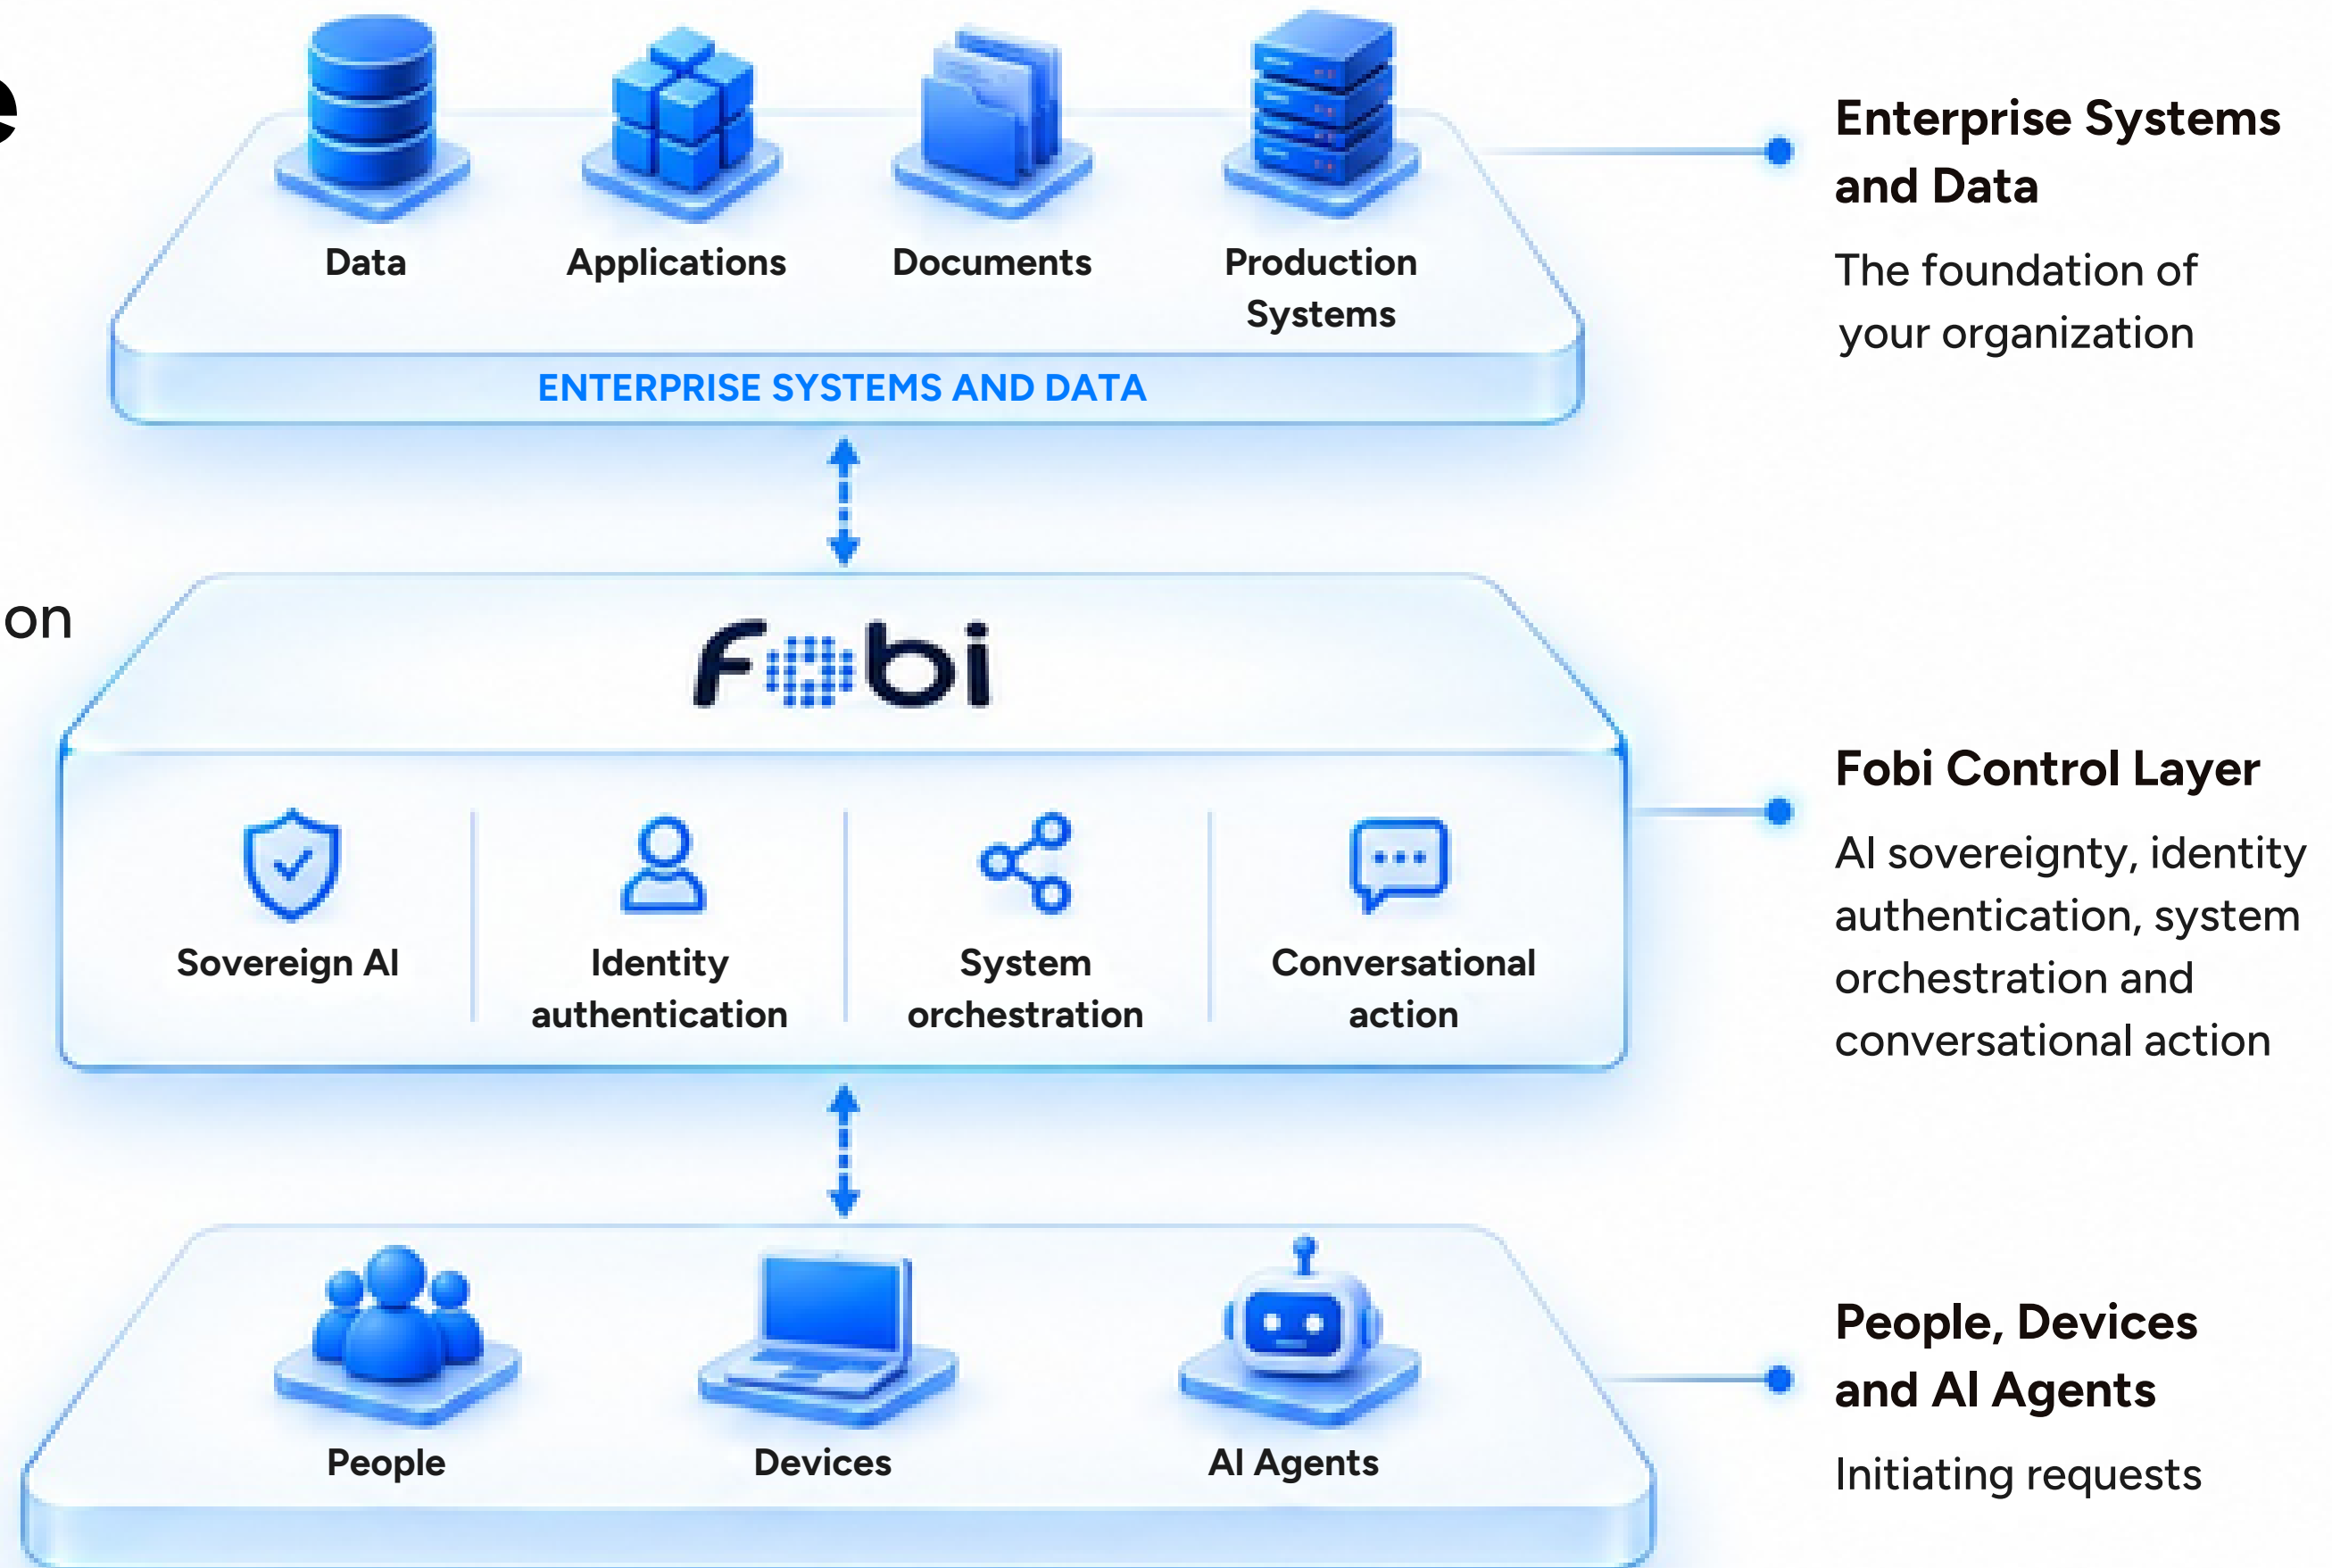

QUANTUM READINESS

How identity and trust remain resilient as cryptographic standards change

Fobi provides the control layer for enterprise AI

The opportunity sits above models and beneath every trusted interaction

The Fobi Flywheel

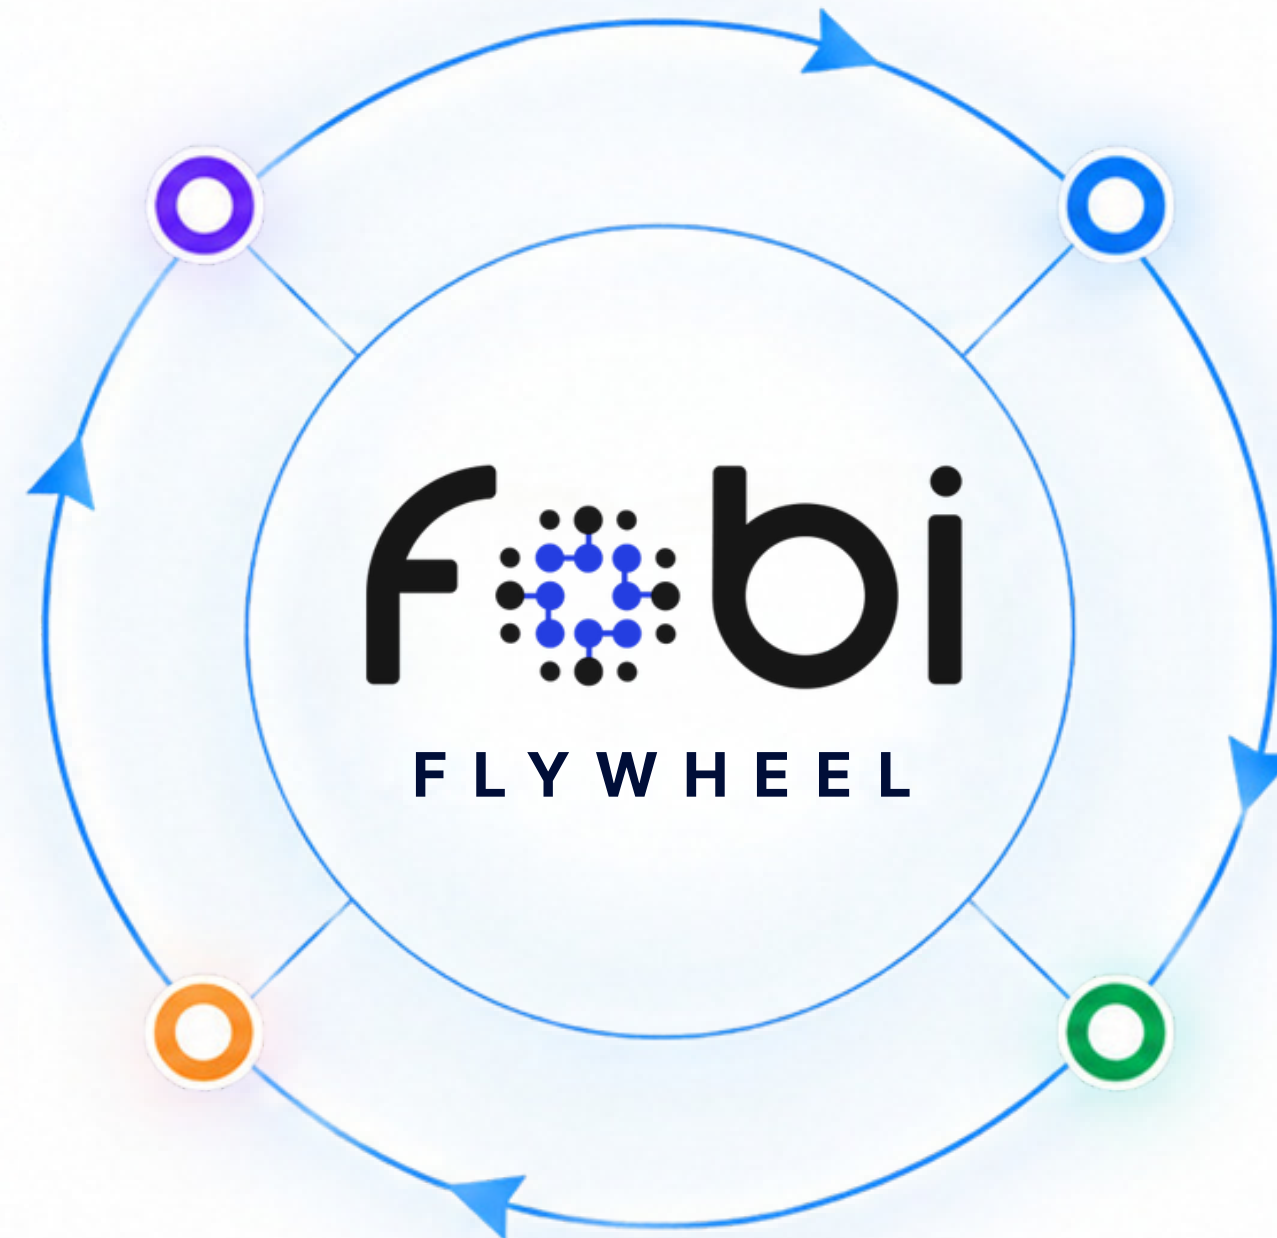

Sovereign intelligence, identity, and trust infrastructure

Private AI for
enterprise data

ALTiD 3.0

Continuous authentication
& post-quantum security

AgenticBrain

Unified conversational
AI interface

FIXYR

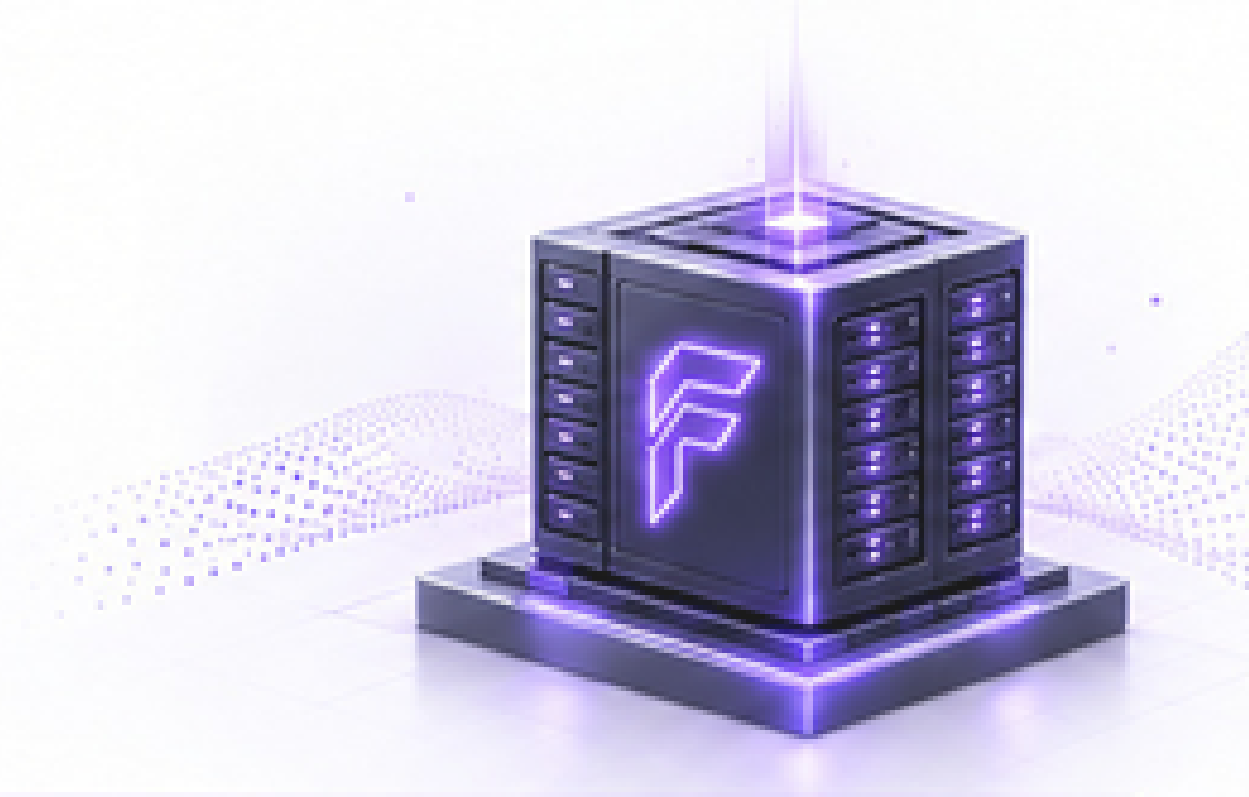

Intelligent workflow and
systems orchestration

Standalone entry points uniting into one scalable platform

Enterprise AI. Entirely Yours

Private AI infrastructure for LLMs, agents, and workflows

Overview

FORTRESS is a complete private AI platform for LLMs, agents and workflows deployed inside your own infrastructure. On-premises, in-country, or fully air-gapped

The Three Pillars

Private Infrastructure
Runs on your servers, in your cloud or in your country

Data Control
Keep sensitive data inside your own environment

Scalable AI Workflows
Run LLMs, agents, and workflows on secure infrastructure

Strategic Positioning

FORTRESS positions organizations to adopt advanced AI with full control over deployment, data residency, security, and governance

Market Applications

Government

Healthcare

Finance & Banking

Legal

Telecom

Sovereign Citizen

The highly scalable, secure infrastructure powering the enterprise AI economy

Securing Identity for the AI & Post-Quantum Era

Evolving Digital Identity Beyond Verification

Overview

AltíD 3.0 is identity verification that doesn't stop at the door. One ID check becomes a credential in your customer's wallet that keeps proving it's really them, and where they are, on every return. Built with quantum-secured trust, and designed to verify devices and AI agents as well as people

The Three Pillars

Identity
Who is this person, device or AI agent?
Verify with confidence

Persistence
Is it still them?
Continuous authentication

Location
Where exactly are they?
Verify presence. Enable trusted access

Strategic Positioning

AltíD 3.0 positions Fobi to lead the next generation of digital trust in a world where quantum risk, fraud, and regulatory demands are accelerating. It enables secure, seamless and scalable identity verification across people, devices and AI agents

Market Applications

Events & Venues

Delivery & Pickup

Online Gaming

Lottery Services

Alcohol

Cannabis

Adult Content

Firearms

The First Sovereign Agentic AI

Agentic AI is becoming the operating layer of every business, and FIXYR is built entirely on sovereign infrastructure.

Overview

FIXYR is agentic AI for customer service. It reads every request, decides the right action, and resolves it end-to-end. For the rare cases that truly need a person, FIXYR maintains Human in the Loop functionality

The Three Pillars

Sovereign Foundation

Controlled, commercially licensed models running on Fobi's own infrastructure on secure Canadian-hosted servers

Flat Cost Curve

Scales to massive ticket volumes without adding a single seat

Self-Improving

Every resolved ticket sharpens the next answer, within your own environment

Strategic Positioning

While traditional support costs grow with every customer, FIXYR flattens the cost curve. It replaces chatbots and copilots with true agentic AI, resolving tickets autonomously, with human escalation only when needed

Market Applications

Retail & E-commerce

Telecom

Financial Services

Travel & Hospitality

Utilities

Government

Live today. Built to scale

AgenticBrain

From API to Agent in Hours

Turn existing APIs into AI agents on the messaging channels customers already know, including WhatsApp and iMessage

Overview

AgenticBrain connects to the APIs and systems you already use, making their capabilities available through natural conversation. One conversation replaces the entire customer journey from intent to outcome without forcing users into a new interface

The Three Pillars

Private

Sensitive data stays under organizational control

Native

Customers interact through the messaging channels they already use, including WhatsApp and iMessage

Closed-Loop

Answers turn into completed actions with controlled execution

Strategic Positioning

AgenticBrain enables enterprises to rapidly deploy AI by reading existing API documentation, mapping secure capabilities, and launching intelligent agents while keeping operations secure and under your control.

Market Applications

Banking &
Financial Services

Retail &
E-commerce

Healthcare &
Life Sciences

Insurance

Manufacturing &
Supply Chain

Travel &
Hospitality

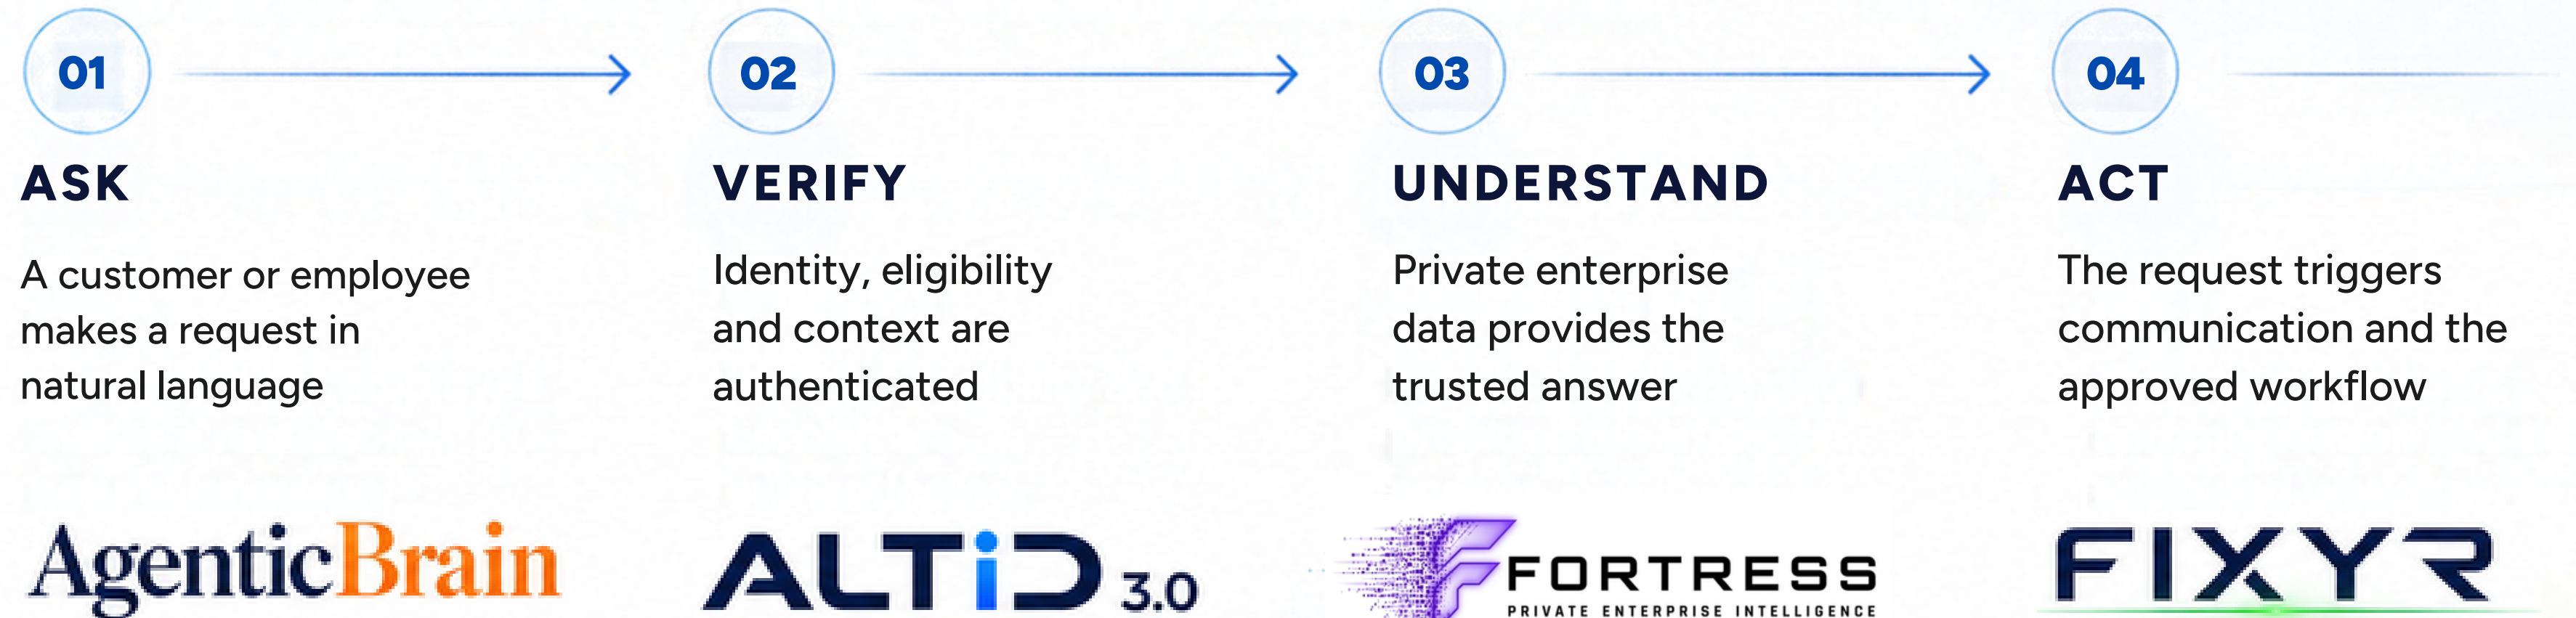

Ticketing &
Live Events

Government &
Public Sector

Built on the systems you already run. Proven by what already works

A trusted enterprise interaction, powered by **the full platform**

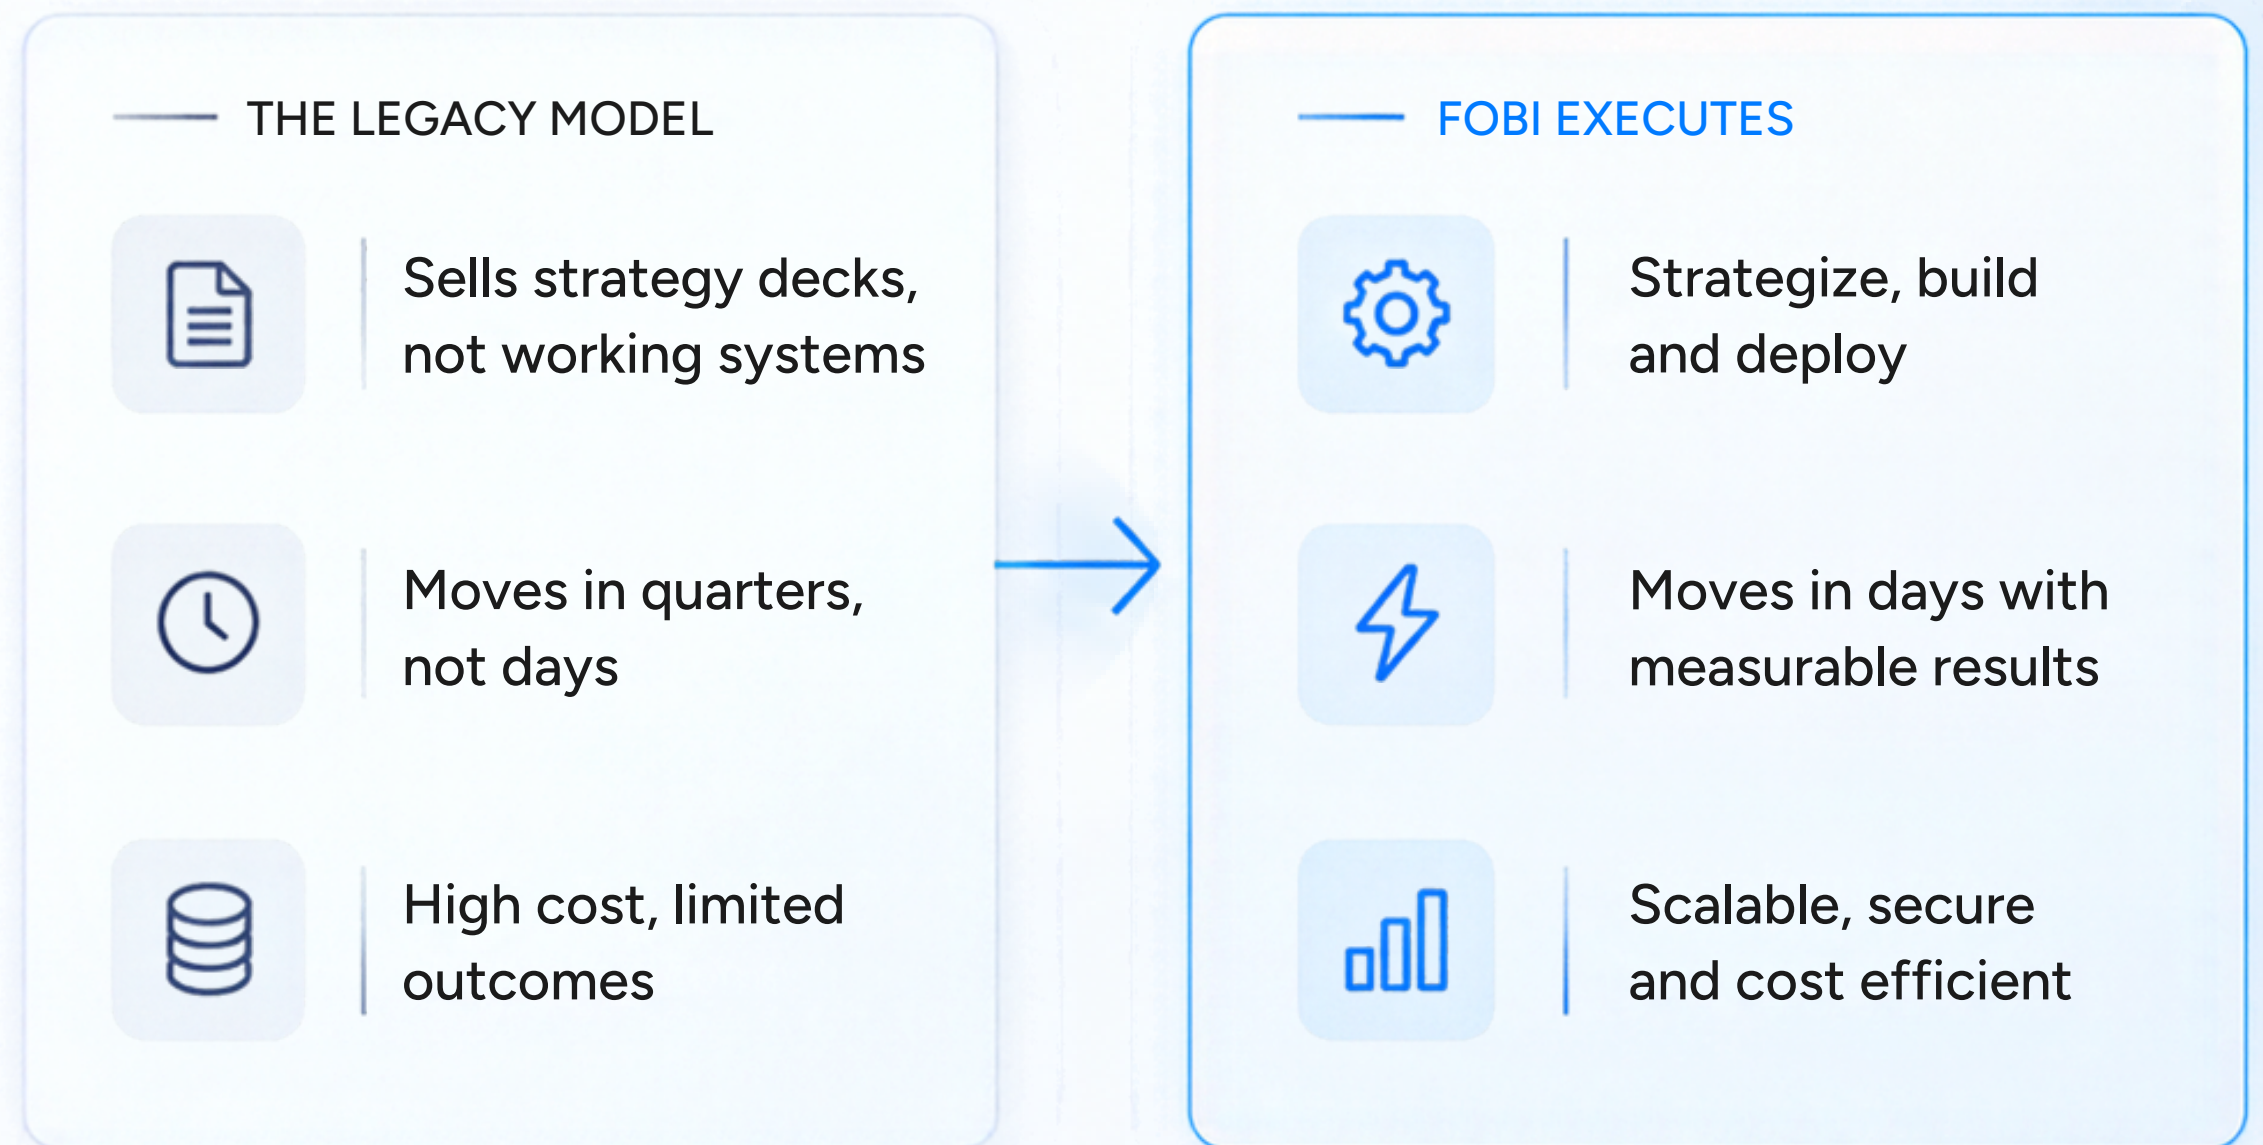

The result

A verified conversation can become a governed action without exposing enterprise data or forcing the user through another portal

AI is moving faster than many businesses can adapt

Fobi helps close that gap by turning AI strategy into working systems — strategized, built and deployed in one connected model

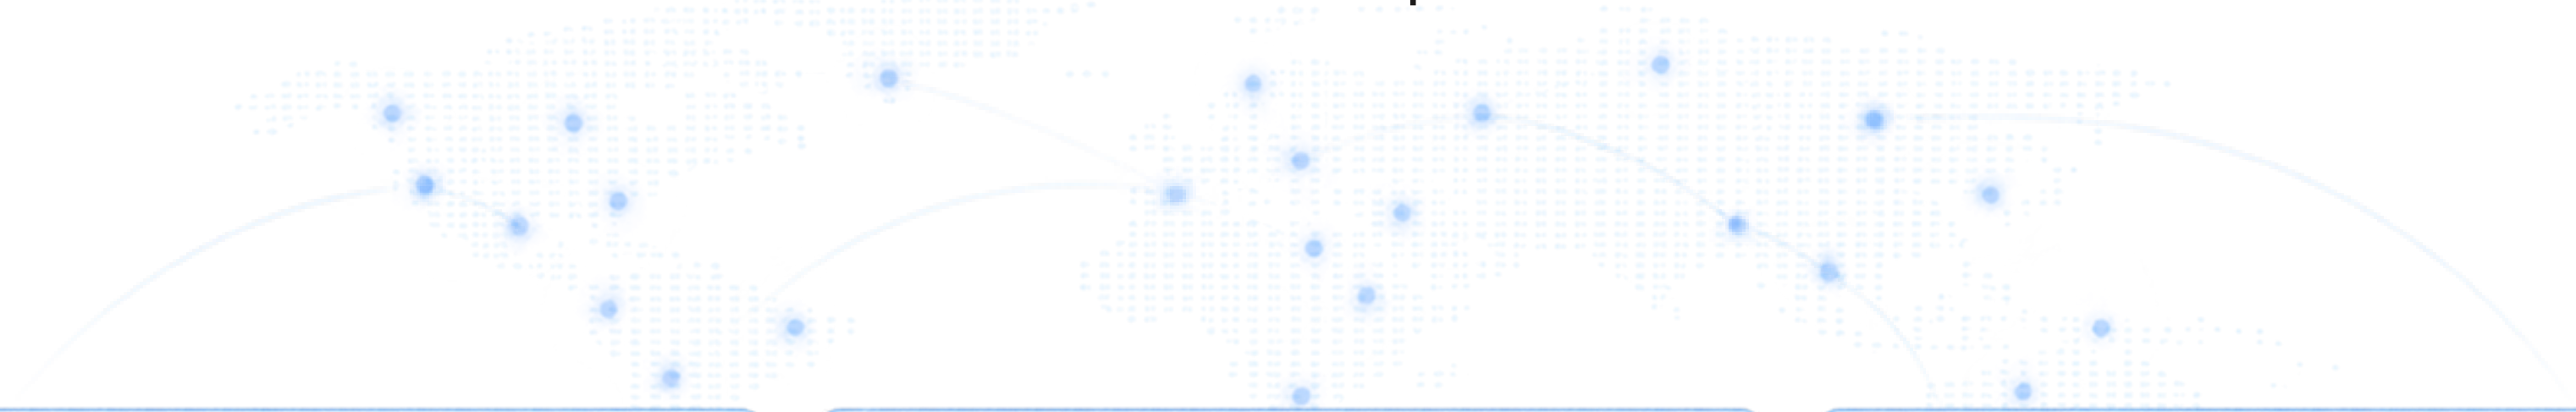

A New Model for the AI Era

Integrated strategy, architecture and execution for enterprise impact

Infrastructure Built for **What Comes Next**

The scale required for sovereign AI and digital trust wasn't built overnight.
It was built on a decade of proven execution.

From Digital Engagement to **Digital Trust**

The infrastructure behind 100M+
Wallet Passes now powers the AltiD
3.0 sovereign credential platform

100M+

WALLET PASSES

From Data Analytics to **Sovereign AI**

Processing 1B+ real-time data
points creates the secure,
governed environment needed for
Fortress AI

1 Billion+

DATA POINTS

From Software to **Agentic Action**

Backed by 9+ years of enterprise
trust, Fixyr and AgenticBrain bring
natural language action to global
systems

9+ Years

DEPLOYMENT
EXPERIENCE

We didn't just pivot to AI. We spent the last decade building the sovereign infrastructure it requires to scale

Historical metrics (100M+ passes, 1B+ data points) reflect Fobi's established global infrastructure
—the battle-tested foundation now powering our next-generation AI and trust platforms

Monetizing the **Control Layer**

Commercial Flexibility & The Fobi Flywheel

OWN THE STACK

We don't just advise on AI—we provide the core identity and orchestration infrastructure that sits beneath every trusted interaction

MODULAR ADOPTION

Built for commercial flexibility, allowing enterprises to deploy focused solutions today and expand seamlessly as requirements evolve

THE FLYWHEEL EXPANSION

Each capability accelerates the others.
Adopting AgenticBrain for action naturally drives the need for AltiD 3.0 to verify users and Fortress to secure the proprietary data

Fobi's platform is designed for expansion—each product increases the value of the others

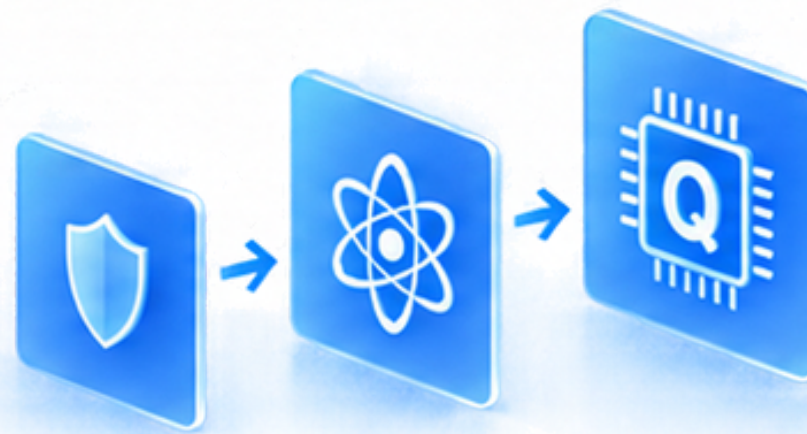

Quantum risk turns identity into long term infrastructure

Quantum computing creates enormous opportunity, but it also changes the security assumptions behind digital identity and encrypted trust

TODAY

Organizations depend on cryptography to protect identity, access and sensitive communications

TRANSITION

Standards and systems must evolve before practical quantum capability threatens existing protections

FOBI POSITION

AltID 3.0 extends sovereign identity into post quantum security and privacy focused verification

Key Customers & Partners

Business & Revenue Model

Multiple Revenue Streams. Scalable Growth

SAAS THROUGH B2B & RESALE CHANNELS

Fobi's solutions are sold directly to end users as well as indirectly through our channel partners to their clients

Revenue is generated by:

- ✓ Upfront and onboarding fees
- ✓ Monthly recurring device and SaaS fees
- ✓ Monthly usage fees
- ✓ Overage fees

WHITE LABEL TECHNOLOGY LICENSES

Fobi's platforms and technologies are licensed to and white-labelled by other companies

This enables them to:

- ✓ Integrate our solution into their services
- ✓ Deliver Fobi's technology under their own brand

PROFESSIONAL SERVICES

Fobi generates revenue through services that accelerate the adoption of its software and licensing solutions

Specifically:

- ✓ Consulting
- ✓ Implementation
- ✓ Custom integration
- ✓ Ongoing support

Flexible revenue streams. Greater market reach. Long-term value

Senior Management Team

Rob Anson, CEO & Chairman

- Founder, Chairman, and CEO of Fobi Suite Technologies
- Founder and CEO of One Team Media
- 10+ years global strategic product development for Walmart, Amazon, Home Depot and others

Uddeshya Agrawal, CTO

- Visionary innovator in Cybersecurity, Web3, AI, and Quantum computing
- Serial tech founder with global engineering and data expertise
- Leads Fobi's technology strategy and strategic partnerships for scalable growth
- Transforms complex technologies into measurable, high-impact business results

Mehul Dabhi, Creative Director

- 10+ years of experience driving creative marketing, brand strategy, and visual design
- Skilled in blending design thinking with data-driven strategies for impactful brand growth

Board of Directors

Rob Anson

CEO & Chairman

- Founder, Chairman, and CEO of Fobi Suite Technologies
- Founder and CEO of One Team Media
- 10+ years global strategic product development for Walmart, Amazon, Home Depot and others

Jeff Hyman

Director

- 20+ years of experience in Wall Street investment banking and financial advisory
- Holds areas of expertise in hospitality, entertainment, casino and gaming, destination and resort, and city infrastructure projects

Peter Green

Director

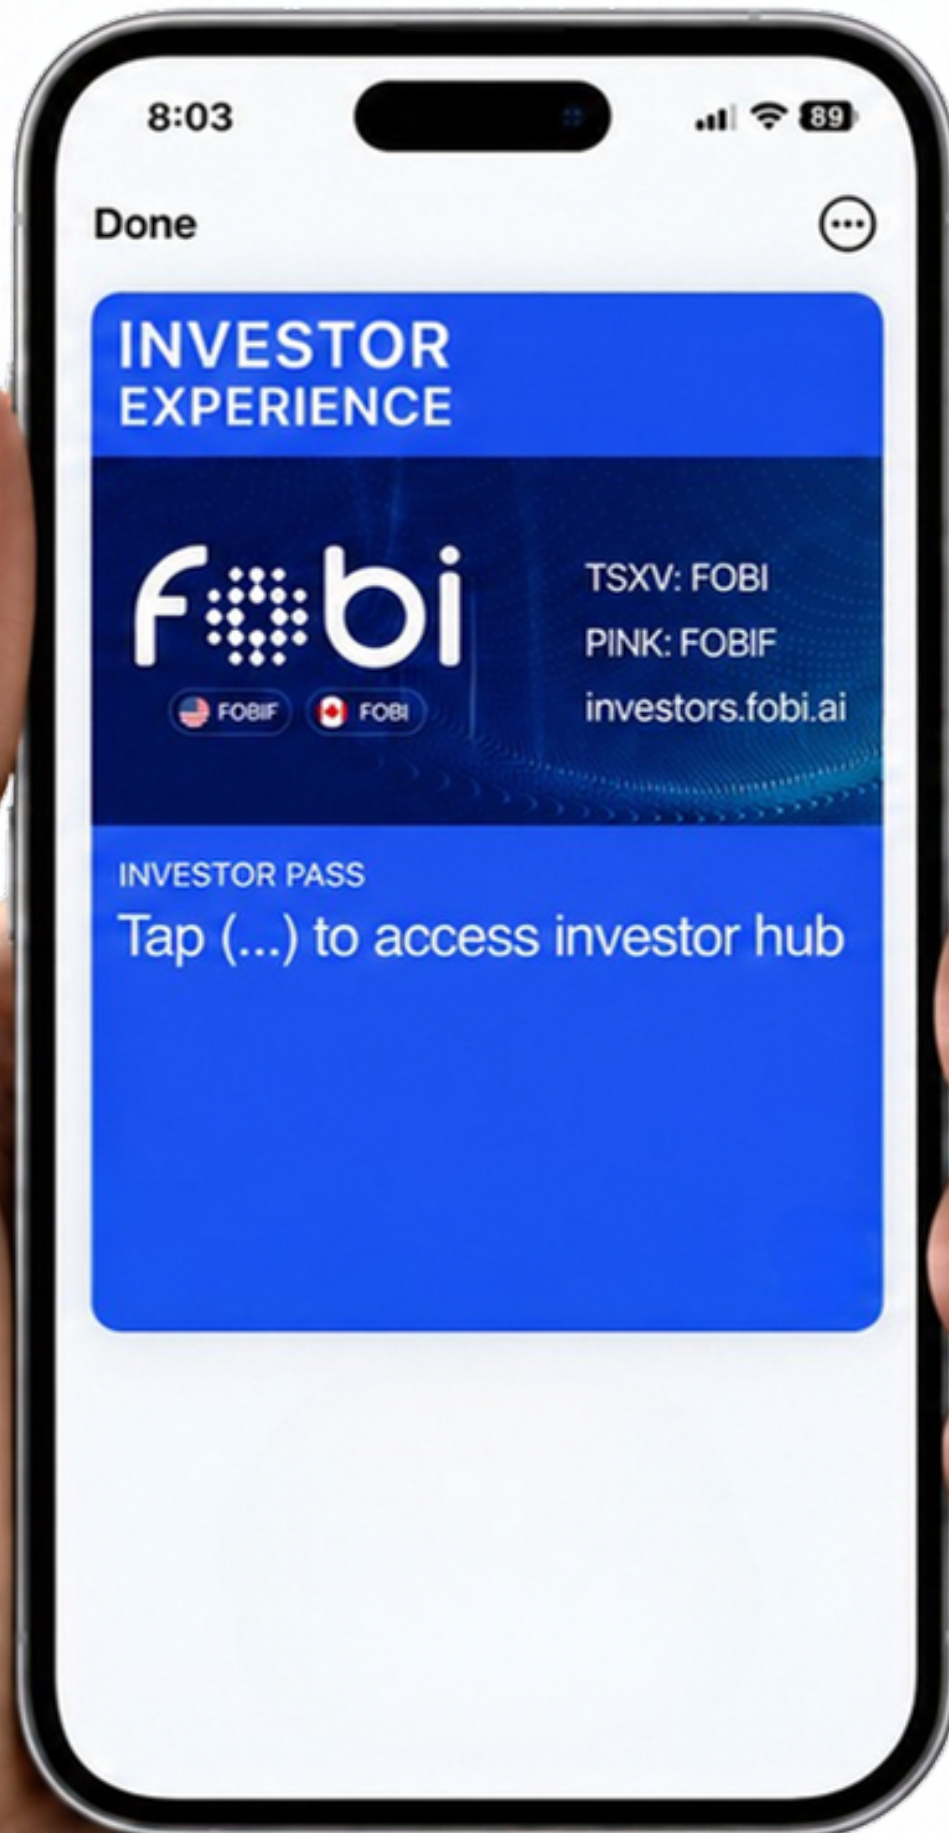

- 25+ years of Executive and Board experience in the tech industry
- Has held strategic leadership roles at companies in the Fintech, Industrial IoT, and Telecommunications industries
- 10+ years on the Executive team with Squirrel Systems, a global hospitality technology innovator

Fobi's team includes talent from major global companies such as...
